Exciting Choices

Selecting the appropriate plant for your needs and conditions can be a daunting task. *Pippi's 2010 Plant Listing* is intended to assist you with your selection. Each plant description includes the botanical name, the common name, the plant hardiness zone, the plant height, when it typically blooms, and a general description. I've also included symbols to represent a range of information from the plants light requirements to whether or not the plant attracts butterflies or hummingbirds. Below is a key to the symbols and abbreviations used in the plant listing.

Also, look for Perennial Plant Association Plant of the Year selections inside. These plants have been selected by members of the Perennial Plant Association for meeting the following criteria:

- Suitable for a wide range of climate types
- Low maintenance
- Pest & disease resistant
- Easily propagated
- Multiple seasons of ornamental interest

The availability of the plants listed varies throughout the growing season. If you do not see a plant that you are interested in, please mention it to us. We will be happy to try to get it for you.

I hope you find the listing helpful and wish you an enjoyable gardening season.

-Vicky Hilleges

Key

○	Full Sun	✿	Dried Flower/Foliage
◐	Morning Sun/Afternoon Shade	🦋	Attracts Butterflies
●	Full Shade	🐦	Attracts Hummingbirds
